# DESIGN THAT LASTS

GORENJE PININFARINA STEEL COLLECTION

DESIGN THAT LASTS

Some trails are forever. To create such trail is to break beyond the confines of time and space. To foresee tomorrow before today ends. To surrender to the eternal beauty embodied in the new Gorenje Pininfarina Collection. Bold lines, gently stroking the senses, follow the idea of outstanding design to blend with the ambiance as its organic complement, elevating its true value. Gorenje Pininfarina Steel Collection.

# TIMELESS ELEGANCE OF STEEL

Gorenje Pininfarina Collection is a perfect fusion of technological perfection and imaginative form: there are no knobs or handles to disrupt the smooth lines luring your eyes. Your gaze will rest and feast on the noble lustre. Timeless elegance of anodized metal finish and the charming fragility of glass. Purity of design harboured by the excellence of materials.

Some forms are in today and out tomorrow. But Gorenje Pininfarina Collection is a new form of life, made to outlast the trends and start a permanent symbiosis. Discrete, yet fatally attractive and breathtaking. Everlasting in space and time.

# ETERNAL AIR OF PERFECTION

Design of the Gorenje Pininfarina Steel Collection is an invigorating unity of opposites. Tradition and durability are intertwined with radiantly bright and unpredictable future. The unstoppable elegance and subtlety of the form are combined with quality and technological perfection to forge a future in which you can enjoy today. Time is on your side. The surprising combination of materials will enchant and entice you. Simplicity of use will convince and thrill you. The interplay of the two will result in a perfect mosaic, a harmony of the beautiful and the efficient. Impermanence of the world and the hedonistic air of the moment coalesce in the timeless trail of perfection of the Gorenje Pininfarina Steel Collection.

# FRIDGE FREEZER

---

### Touch control screen

Integrated in refrigerator's elegant silhouette is a vertical stripe made of black glass with an interactive touch screen. The user-friendly display expands refrigerator functionality as it turns it into the kitchen's communication hub. In addition to basic refrigerator functions, it allows recording and playing voice messages, viewing tips on food storage and browsing through recipes for delicious dishes.

### Quick View

A panel of black glass runs vertically down the front. Activated by a touch screen, a square area of tinted grey glass in the middle turns into a transparent window to reveal a practical and exciting view into the fridge interior.

### A bottle shelf with two compartments

A holder made of light metal is yet another smart functional detail offering flexible storage for bottles of different sizes.

### Cosmetic boxes

How thoughtful! Two small white boxes adorning each side of the transparent window are the perfect place to store cosmetics or medicines. A small concave handle makes them easy to open.

### Interior concept

The choice of colours, shapes and materials in the refrigerator interior is consistent with the overall design concept. The shelves are made of tinted grey tempered glass that contrasts beautifully with the convex anodised aluminium shapes.

The concave and convex shapes are used alternately to give the freezer a dynamic look, while providing the best possible use of space. The Big'n'Freeze compartment on telescopic guides enables easy storing of bulky food.

## No Frost Advantage

The harmonious impression of the line's exciting appearance is further accentuated by ingenious functional features and state-of-the-art technology. The food in your Gorenje Pininfarina Black refrigerator will remain fresh and appealing for much longer. This is thanks to cutting edge No Frost Advantage technology, which allows for the circulation of chilled air in storage areas, reducing the level of humidity in the freezer and preventing the formation of ice on food items and in the interior. Frozen items do not stick together, while even temperature control helps to preserve the quality, colour and aroma of food. No accumulated ice also means the optimum use of storage space, while at the same time eliminating the need for time consuming defrosting.

One of the key competitive advantages of Gorenje fridge freezers is a system which effectively eliminates humidity from the freezer section only, while maintaining the optimum level of it in the fridge section of the appliance. This prevents food from drying out, and ensures the optimum conditions for long-term storage of fresh food in the fridge.

### In'n'Out tray

The combination of dark natural wood, durable aluminium and soft shapes pays respectful homage to the past while considering the future. The multifunctional pull-out shelf can be used as a serving tray.

### Zero'n'Fresh Compartment

The two concave bins in Zero'n'Fresh drawer fit perfectly between the back panel and the door. Zero'n'Fresh compartment enables maximum use of space while providing a 0 °C fresh zone for storing vegetables, fruit and meat.

# OVEN

## Touch control screen

The solid convex metal handle crossing the black glazed surface like a bridge and the touch control screen adorning the upper section of the oven evoke an impression of timeless elegance. The bold lines of the dark vertical glass stripe will gently stroke your senses as they follow the idea of superior design. The touch control screen is a unique feature. Smooth glass surface is easy to clean and the screen offers a wide array of possibilities. For example, it allows you to store your own combination of cooking functions and to browse your favourite recipes.

## Matching microwave décor panel

High technology harboured by noble reflections of steel and overwhelming transparency of glass. A unique combination of timeless elegance and technological perfection that open up a new culture of living. Bold lines, gently stroking the senses, follow the idea of outstanding design to blend with the ambiance as its organic complement.

## Oven door

The black glass stripe on the oven door is a daring experiment in transparency and illusion. The oven light neutralises the tinted grey tones and reveals a transparent, clear glass, offering an unmatched view of the delicacies you are preparing.

## HomeMADE oven

A unique innovation modelled on traditional wood-fired bread ovens! Gorenje multi-system ovens with unique arched cavity ceiling and original HomeMADE technology that allows the effect of the traditional wood-fired oven also boast exceptional volume (65 litres) and maximum useful baking area. BigSpace feature means extra volume and baking area which makes the oven ideal for larger baking sheets, preparing larger chunks of food, and effective baking at several levels simultaneously.

## Pull-out telescopic guides

The oven boasts pull-out telescopic guides, which make it easy to take out hot trays and improve control of the cooking or baking process.

## Ultra Cool Door - triple glazing with two reflective layers

Advanced UltraCoolDoor (UCD) technology with triple temperature-reflective oven door glazing allows the door to remain cool even during cooking. You may touch them without worrying. Excellent door insulation also improves capacity and energy efficiency of the oven that meets the most stringent standards of energy economy and ranks in the A<sup>-20%</sup> energy class.

# HOBS / HOOD

---

## Induction hob

Modern technology can turn even the simplest dish into a culinary highlight while the magical lustre of the induction hob's black finish will make every piece of cookware seem like a work of art. Inspired graphical features elegantly mark the operating zones as they tell their story of perfect design. Control panel is integrated into the black glossy cooking hob. When a cooking field is switched on, the sensors will be lit up by gentle red light that to create exciting reflections and rouse your imagination. What do you want to cook today?

## MultiSlider Control

The innovative MultiSlider control technology allows total control of cooking power, time, and other functions for each cooking zone separately. Each zone thus becomes a world unto itself, controlled by elegant sliding of your finger across the control area. Each zone has a dedicated timer and a slide control module, allowing you to set the power level and cooking time for each zone independently. MultiSlider technology also supports special functions such as PowerBoost, BoilControl, StayWarm, SoftMelt, and StopGo. MultiSlider touch control allows excellent clarity of view and affords more pleasure with induction cooking!

### Gas on glass ceramics

Uniqueness of the distinctively different design of the gas hob with a glass ceramic plate and innovative electronic touch control will stand out at first sight. Genuine cast iron support grid on shining glass ceramic surface symbolizes power and durability. Prestige and the taste of the good.

### A touch to tame the flame

Innovative electronic touch control is a novel feature in the gas hobs of the Gorenje Pininfarina Steel Collection. This remarkable highly perfected feature delivers convincing functionality and efficiency. Electronic touch control of gas flow allows accurate adjustment of energy and immediate changes in the flame power – by touch alone. An upgrade to the TouchControl feature on gas hobs is the automatic timer which allows accurate setting of cooking time independently for each burner. If the flame goes out, electronic regulation will take care of automatic restart while clearly laid out control modules will allow monitoring the status of each burner.

## Hood

In a modern kitchen, the hood is the central element of design and the most appealing feature of the room. Gorenje Pininfarina Steel hood is nothing less than an outstanding feat of engineering. Its contrasts welcome your spontaneity, and have a calming effect by inspiring a feeling of inner balance and fulfilment. It is so much more than a flawless display of superb materials and shapes - it is an efficient and super-silent appliance that cleans the air in your kitchen.

## TouchControl

The keys and knobs are a relic of the past; what remains is pure simplicity and aesthetics of the electronic user-friendly operation. Carefully studied positioning of the control section on vertical glass strip enables simple setting of the extraction power adjustable in four levels.

Fridge freezer - freestanding

### Design

- Colour of steel

- Door opening: right
- Total gross/net volume: **352 / 320 l**
- Energy consumption kWh/24h: **0.925 kWh**
- Energy consumption kWh/year: **338 kWh**
- Level of noise (max.): **42 dB(A)**

- Electronic control
- Type of display: Touch Screen Display
- Digital temperature indicator
- Separate control of refrigerator and freezer
- 2 compressors
- Door hinge: self closing door hinge
- Sound signals in trouble
- Cook book / Tips
- Saving programmes: Go'n'Save / Saving
- Interior colour: white

### Fridge

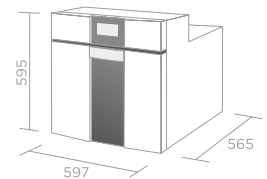

- Interior halogen lighting
- Net capacity fridge: **245 l**
- Multiflow cooling - fridge
- Auto defrost fridge
- Fast cooling
- 0°C - drawer with two Zero'n'Fresh drawers on telescopic guides (33 l)
- 3 glass shelves
- 2 vegetable drawers
- 6 door shelves
- In'n'Out Serving tray on telescopic guides
- Flexible egg tray (12x)
- Bottle holder
- Tube holder
- Refrigerator odour elimination filter

### Freezer

- Net capacity freezer: **75 l**
- Freezing capacity in 24 hours: **10 kg**
- Power cut safe time: **18 h**
- No frost
- Fast freezing
- Pull-out drawer Big'n'Freeze on telescopic guides (38 litres)
- 1 drawer for fast freezing
- 2 storage drawers
- 2 ice trays

Product dimensions (W×H×D): **60 × 200 × 64.5 cm**
