

Gorenje Ora- Īto Collection: Inspiration of light

Simplexity. Simple and complex. With unnecessary surplus taken away, only the clean design lines remain. The simple design that surrounds us today and tomorrow. Simple clean lines mirror design for the future when vision becomes reality.

White. Or as the designer himself refers to in his language: Le blanc! It captures the entire light of the world. Its purity and simplicity reveals every detail. Associated with white, design attains special meaning. Light derived from fusion of all colours allows no mistakes. The appliances of the special Gorenje Ora-Īto Collection are therefore clad in white.

With magic power of light! Think colours. Choose white.

Minimalist and elegant interaction of modern and precious materials; white glass and pure aluminium.

Elegant opal glass surfaces that cover the entire front doors of the new collection are in harmony with the design of the brushed aluminium handles in stainless-steel. They tell an immortal and permanently modern story of metal and glass.

A HEARTBREAKING DECISION, ISN'T IT?

Ora-Itto: the worshipper of white

To make the exclusively designed stylish appliances more accessible to a wider audience, Gorenje started to collaborate with young French Designer Ora-Itto. The result of this cooperation is the Gorenje Ora-Itto Collection. First in black, now in white colour, with magic power of light.

White is my favourite colour. It is timeless, eternally present. Its dominance is immaculate and dresses objects in innocent freshness. I have been dreaming about the future permeated with glowing light. White is the colour reflecting such light - these are the thoughts of innovative French designer hiding behind the Ora-Itto brand. His intrepid ideas have rocketed him to the very top of the global world of design. At the beginning of his career he presented his designs and ideas for the virtual products, undersigned by known brands on his own website. People began ordering products which did not exist. Large companies like Louis Vuitton, Nike, Gucci, Swatch, Apple and Levi's, could have sued the young pretender but were so impressed by his designs, that they hired him instead.

Ora-Itto characterizes his recognizable style as simplicity; combining simplicity and complexity. His concepts are futuristic and provocative.
